

Dear Paul,

3/16/79

Your 1/2 first-class mailing came today, thanks. I've skimmed it while resting from outside work I've missed very much during the hard winter. However, it now tires me more easily and from the arterial obstruction(s) I feel the lack of oxygen after some forms of exertion. So I read or skim while I rest, before I feel I can really return to what requires concentration.

I've had four programs lately. Professional avoidance of speeches by the agencies. I have another one on the 28th. Now that I enjoy the relative luxury of Social Security, which does give me a regular if quite nominal income, I'm using this, meaning the honoraria, for help.

Through a student who is working on my CIA files I found out about a night student who could use some work. Both are at Hood, both a bit older than the fresh-from-high school collegiates, but neither other than young. Both are also bright and pleasant.

As you will see from the reminder I've written the one who is helping me, there are differences and we will check.

This can be quite valuable in FOIA matters, as the earlier worksheets were. Now in court records in the worksheet case.

I'm glad you mentioned records being made available to others. Through administrative action inside DJ I'm to get all the FBI releases. To date performance by the FBI is zilch. But I can remind the DJ and will from your letter.

I did get the FBI records (only) that Mickey Levy got.

I'm keeping these separately, as I will be doing with your copies.

This is not only for present retrieval. It is for future Archival purposes.

I enclose a check for \$10 more than the cost of this mailing. When I owe you more please just let me know. You can keep it in your head. No need to keep books. Close is enough.

I never receive anything from Bud and of course have and have had no CIA connection, so I would not get his board letter. On your 3/10 list I'd appreciate copies of 7, 15 & 16.

I agree with you on the LBIU article. It is provocative! And there was more of that that the article indicates, from what I learned. The DID even suspected that the CP had penetrated it. As I recall there were but three members, each someone's informer.

Please give me the name of the requester responsible for the Newarl and Little Rock releases. I can read 684 pages while I rest, which I can't do with a large file. If there is anything of interest after I get it I'll send you copies.

Minckle is doing a series. I'll not be surprised if he decides to amplify it into a book, but he has not indicated that and I have not suggested it. I heard from him this past week so I think he had not yet done the writing. I'll appreciate your sending the pieces because reporters are notoriously undependable with these things.
